

INDEPENDENT GYMS · 50-500 MEMBERS

Your gym gets a **full AI team** without renting it from a **SaaS company.**

One URL · runs in your browser · your data on your laptop · 24/7 lead capture · member retention · content engine · all the AI ops the chains have. **\$49/month or \$890 once.**

THE PROBLEM

You're paying for a stack you barely use.

Most independent gym owners we talk to are paying for 3-6 tools every month. Marketing, CRM, content, scheduling, analytics, AI. The bills compound. The tools talk to nothing. Members still drift. Leads still go cold at 9pm.

MindBody Starter	\$99-159/mo
Separate CRM	\$30-100/mo
Canva Pro	\$15/mo
Content writer	\$300+/mo
ChatGPT Plus	\$20/mo
Typical stack	\$464-594/mo

You use 20% of what you pay for. The rest is friction. The chains can afford this because they have 100 locations. You can't.

WHAT GYMOPS IS

One URL. Eight AI specialists. One director.

GymOps is a single web page that lives in your browser tab. Inside it: a CRM, an invoicing tool, a content engine, a member retention specialist, a marketing coordinator, a website builder, and a live analytics dashboard. They all talk to each other. They all read from one config. They're all included.

**Director**

Runs the whole AI team

**Front Desk**

Lead capture · 24/7 reply

**Sales Assistant**

Follow-up · close

**Content Manager**

Posts that sound like you

**Retention**

Catches drifting members

**Receptionist**

WhatsApp · email · FAQ

**Marketing**

Social schedule + post

**Admin**

Scheduling · no-shows

**Analyst**

What's working · what's not

WHAT MAKES IT DIFFERENT

Sovereign by design. Yours forever.

Your data stays on your laptop

Your members' details, leads, content history — all live in your browser. Not in San Francisco. Not in Sydney. Yours. If you close the laptop, it's still there. If you switch laptops, you export a single file.

Buy it once OR pay monthly

\$49/month if you want flexibility. \$890 once if you want it for life. No 12-month contract lock-in. No auto-renewal trap. No per-member surprises.

Speaks your language

English, Thai, Bahasa, Tagalog, Vietnamese as natively as it speaks English. The AI learns your tone of voice from your existing posts in 5 minutes.

HOW ONBOARDING WORKS

From sign-up to running · 14 days.

1. **Day 0 (within 24 hours)** · 30-min activation call · your URL is live · API key pasted · first AI engine connected.
2. **Day 3** · 15-min check-in · Phase 1 of in-app onboarding done · first social post drafted.
3. **Day 7** · 20-min review · social platforms connected · first lead captured · first content posted.
4. **Day 14** · 30-min review · pipeline value calculated · retention messages flowing · renewal conversation.

By Day 14: you can tell us this tool has saved you 8+ hours a week. If not, you walk · we delete the licence. No retention games.

QUESTIONS

The honest FAQ.

Where does my member data live?

What happens if I stop paying you?

What if GymOps goes out of business?

Do you replace MindBody or run alongside?

How is this \$49 when MindBody charges \$99-159?

Is the AI any good?

What about GDPR / PDPA / Australian Privacy Act?

Try it free for 30 days.

No card. No auto-renewal. If by day 14 you can tell me this thing
has saved you time, you pay. If not, you walk.

WHO YOU'LL BE TALKING TO

Independent. Direct. Honest.

GymOps is sold and supported by an independent operator who has worked inside gyms. No call centre. No tiered support queue. You talk to a human who knows what a 6am HIIT session feels like.

For a 15-minute demo personalised to your gym, email hello@gymops.app — typical reply inside 4 hours.
